AI Assistants for Credit Managers

Copilot • Claude • ChatGPT • Gemini • Grok • Meta AI

The kitchen analogy

A simple way to understand how these AI assistants work and compare.

Kitchen = the app or workspace you use

Brain = the AI model (that does the thinking)

Hands = tools and connectors (that let it do things)

Chef = the agent that works for you (runs tasks)

Recipe = reusable instructions and skills

Pantry = your source files and knowledge (governed documents)

Microsoft Copilot

Owned by **Microsoft**

Microsoft

- **Brain** — Microsoft and OpenAI models
- **Hands** — Microsoft 365 apps and SharePoint
- **Chef** — **Copilot Agents** — Build and run agents for your work
- **Recipe** — **Agent instructions** — Reusable guidance and skills
- **Pantry** — **SharePoint** — Your governed files and knowledge

Claude

Owned by **Anthropic**

ANTHROPIC

- **Brain** — Claude models Anthropic models
- **Hands** — Connectors and Claude for Work
- **Chef** — **Claude Cowork** — Agent workflows and automations
- **Recipe** — **Skills** — Reusable instructions and capabilities
- **Pantry** — **Projects** — Your files plus governed documents

ChatGPT

Owned by **OpenAI**

OpenAI

- **Brain** — GPT models OpenAI models
- **Hands** — Built-in tools, plugins and apps
- **Chef** — **Workspace Agents** — Build and run reusable agents
- **Recipe** — **Skills** — Reusable instructions and capabilities
- **Pantry** — **Your governed documents** — Connect to SharePoint, Google Drive or upload controlled files

Gemini

Owned by **Google**

Google

- **Brain** — Gemini models Google models
- **Hands** — Google Workspace tools (Gmail, Drive etc.)
- **Chef** — **Gemini tasks** — Create and run task automations
- **Recipe** — **Gems (moving to Skills)** — Reusable instructions and configurations
- **Pantry** — **Google Drive** — Your governed files and knowledge

Grok

Owned by **xAI**

xAI

- **Brain** — Grok models xAI models
- **Hands** — Connectors and actions (web, X etc.)
- **Chef** — **Grok Bot** — Create custom bots (in separate app)
- **Recipe** — **Bot skills** — Reusable instructions and capabilities
- **Pantry** — **Connected document store** — Use web, X and your connected files

Meta AI

Owned by **Meta**

Meta

- **Brain** — Muse Spark Meta AI model
- **Hands** — Meta apps (Facebook, Instagram, WhatsApp, Messenger)
- **Chef** — **No direct equivalent** — No custom agent builder yet
- **Recipe** — **AI Studio** (creation ended Aug 2026) — Previously used for custom AIs
- **Pantry** — **External sources** — Use your own governed documents (e.g. SharePoint / Google Drive)

Same ideas, different labels.

Each platform uses different names, but they all follow a similar pattern:
kitchen (app) · brain (model) · hands (tools) · chef (agent) · recipe (skills) · pantry (files)

Where should your credit policies live?

Keep your approved credit policies, templates and reference documents in a governed location (e.g. SharePoint or Google Drive) and give your AI agent controlled access to read and use them.

WHERE TO BUILD YOUR AI AGENT

Six assistants · Where to go · What to click

Copilot

Owned by **Microsoft**

Microsoft

WHERE TO GO
microsoft365.com
Sign in with your Microsoft account.

WHAT TO CLICK
Agents → New Agent
Follow the prompts to create your agent.

BUILDS
Copilot agent
Your custom agent with instructions and knowledge.

ADVANCED OPTION
Copilot Studio
For more advanced agents, connectors and automation.

Claude

Owned by Anthropic

ANTHROP\C

WHERE TO GO
claude.ai
Sign in with your Anthropic account.

WHAT TO CLICK
Projects → New Project
Add instructions and upload your files.

BUILDS
Project with instructions + files
Customised assistant for your work.

REUSABLE WORKFLOW
Customize → Skills
Create Skills for reusable instructions. Projects and Skills are assistant customisation, not a fully automated agent.

ChatGPT

Owned by **OpenAI**

OpenAI

WHERE TO GO
chatgpt.com
Sign in with your OpenAI account.

WHAT TO CLICK
Agents > Create
Build a reusable Credit Review Agent

BUILDS
Workspace Agent
Policy references, tools and Skills

IMPORTANT NOTE
Agents + Skills
Use versioned policies and approval checks.

Gemini

Owned by **Google**

Google

WHERE TO GO
gemini.google.com
Sign in with your Google account.

WHAT TO CLICK
Gems → New Gem
Follow the prompts to create your Gem.

BUILDS
Custom Gem
Your customised assistant with instructions and files.

IMPORTANT NOTE
Personal Gems move to Skills from Nov 2026.
Check the latest Google updates.

Grok

Owned by xAI

xAI

WHERE TO GO
x.ai/bot
Open the Grok Bot application (separate from grok.com chat).

WHAT TO CLICK
Install Grok Bot → New → Create new Bot
Follow the prompts to set it up.

BUILDS
Grok Bot
Your custom bot with instructions and files.

IMPORTANT NOTE
This is in the Grok Bot application,
not the standard grok.com chat experience.

Meta AI

Owned by **Meta**

Meta

WHERE TO GO
No current new **consumer custom-AI** builder available.
Use meta.ai for chat.

STATUS
AI Studio creation closed Aug 2026.
Meta no longer offers a consumer tool to create custom AIs.

BUILDS
Not available
Custom AI agent building is currently not available.

NOTE
You can use Meta AI for chat and existing Meta AI features,
but there is no consumer agent builder at this time.

Credit manager tip: Keep approved policies in governed SharePoint/Drive or your document system. Give agents read-only access or controlled reference copies. Human approval for credit decisions.

Feature availability varies by plan, workspace and region.
Checked October 2026.

Where to find things in each AI Assistant

Navigation • What it's used for • Best use for credit managers • Where your policies should live

Copilot

Owned by **Microsoft**

Microsoft

Left bar (example)

- Home
- Chat
- Agents
- Create
- Pages
- Notebooks
- Apps

Agents
Build and use AI agents for your work

Pages
Create documents, plans and content

Notebooks
Keep context and files

Apps
Connect to Microsoft 365 (Outlook, Teams, SharePoint)

Best for credit managers

Build a Credit Review Agent connected to your files and Microsoft 365 data.

Claude

Owned by Anthropic

ANTHROP\C

Left bar (example)

- New chat
- Projects
- Artifacts
- Skills
- Claude for Work

Projects
Organise chats, files and instructions

Artifacts
Create and edit content (visuals, code, documents)

Skills
Reusable instructions and capabilities

Claude for Work
Connectors and tools (for team plans)

Best for credit managers

Use **Projects** for ongoing customer reviews and Skills for repeatable credit workflows.

ChatGPT

Owned by **OpenAI**

OpenAI

Left bar (example)

- New chat
- Search
- Projects
- Agents
- GPTs
- Library

Agents
Build and run AI agents (with tools and files)

Projects
Organise related chats and files

GPTs
Create specialised assistants (simple)

Library
Store files and references for reuse

Best for credit managers

Use **Agents** for a Credit Review Agent with your policy, workflows and tools.

Gemini

Owned by **Google**

Google

Left bar (example)

- New chat
- Gems
- Saved
- Apps
- Drive
- Activity

Gems
Create and use custom AI assistants

Saved
Keep important chats

Apps
Connect Google apps (Gmail, Drive, etc.)

Drive
Use your Google Drive files

Activity
View recent activity

Best for credit managers

Use **Gems** for a Credit Review Assistant connected to your Google Drive files.

Grok

Owned by xAI

xAI

Left bar (example)

- Home
- Explore
- Grok
- Grok Bots
- Files
- Settings

Grok Bots
Create custom AI assistants

Explore
Search and analyse real-time information (X and web)

Files
Upload and use your files

Settings
Manage preferences and connections

Best for credit managers

Use **Grok Bots** for research-focused credit analysis with real-time information.

Meta AI

Owned by **Meta**

Meta

Left bar (example)

- New chat
- Discover
- Library
- AI Studio
- Settings

Discover
Use Meta AI in Facebook, Instagram, WhatsApp and Messenger

Library
Keep your chats

Settings
Manage preferences

AI Studio
Create custom AIs (creation paused Aug 2026)

Best for credit managers

Useful for quick research and summaries. No current custom agent builder.

Where should your credit policies live?

Keep your approved credit policies, templates and reference documents in a governed location.

- **SharePoint / OneDrive** (Microsoft) — Connect to Copilot Agents
- **Google Drive** (Google) — Connect to Gemini Gems
- This keeps version control, access permissions and your official records.
- **SharePoint / OneDrive** (Microsoft) — Connect to ChatGPT Agents
- **SharePoint / OneDrive** (or other source) — Use with Claude Projects
- **Use a controlled source (e.g. SharePoint, Drive or uploaded files)** — Reference in Grok or Meta AI

Same idea, different names

Each platform uses different names, but they follow a similar pattern.

- **Kitchen** (where you work)
- **Brain** (the AI model)
- **Hands** (tools and actions)
- **Chef** (the agent you build)
- **Recipe** (instructions and skills)
- **Pantry** (your files and knowledge)
